

Monte Leng

Identity & Access Management Professional

Phone: **+1 408 667 6497**
Address: **Bloomington, Illinois**
Website: <https://www.monteleng.com>
Email: monte@monteleng.com

Accomplished and solutions-focused professional with extensive experience designing IAM architectures, managing projects, and transforming IT program critical to business operations. Instrumental in developing long and short-term plans for application selection, systems development, and acquisition of resources. Adept at software deployment and up gradation, technical and application support, network and infrastructure management, and implementation of strategies that effectively utilize IT resources. Expert in partnering with stakeholders to analyze needs and issues, define and achieve consensus on strategies, and implement technologies and best practices to deliver consistent, repeatable, and high-quality services. Skilled trainer and project leader, able to direct multi-faceted teams to achieve business objective and ensure work complete within time and budgetary constraints.

EXPERIENCE

Self Employed

Sep 2015 to Present

Entrepreneur

Spearhead business digital operations, including website development and management. Oversee design and enhancement of systems and integrating new systems with existing ones. Develop standard operating procedures allied to best practice, and ensure written protocols and guidelines for staff. Manage business social media platforms such as Facebook, Instagram, Twitter, Google+, YouTube and LinkedIn to elevate brand awareness and boost sales. Analyze business requirements to determine technology needs.

Oracle, America

Mar 2005 to Sep 2015

Consulting Technical Manager Security Practice

As Consulting Technical Manager, Security Practice, Oracle Consulting, USA, I was one of 8 members of the Oracle Security Center of Excellence team. I am a domain expert on the Oracle Access Manager. Over a 15 year period with Oracle (and Oblix, Inc.), I traveled extensively in the USA and Europe to participate in over **60 projects** related to Identity and Access Management and Security ranging from a few weeks to over one year. My roles ranged from staff augmentation team member to project engineer with 20 team members and multi-million dollar projects.

Oblix, Inc

Jul 1999 to Mar 2005

Technical Operations Manager

Oblix, acquired by Oracle in 2005, was a small internet startup that developed an Identity Management system based on LDAP technology. The Oblix product evolved into an Identity and Access Management platform. I started with Oblix as it's second

Technical Support Engineer. I was subsequently promoted to Technical Operations Manager.

I designed, developed, implemented and supported company web sites and the company's initial customer management system. I was awarded the "Star Performer" award twice, February 2000, and December 2002. I performed on site support activities at customer locations in the USA and Europe. During the Oracle acquisition I helped transfer and on board computer systems from Oblix to Oracle.

Heuristics Search Inc

1997 to Jun 1999

Director Of Information Technology

Started as Web Producer and promoted to Director IT. Responsible for 5 staff members to support 100+ employees and all internal IT systems. Project Director for developing and migrating customer call center application to custom built on-premise internet based system. Deployed and managed the company's intranet.

XImage

1995 to 1997

Senior Product Support Engineer

Hired as a product support engineer for the company's Image processing software, which ran on Sun Solaris servers with Sybase database back end. I developed the company Intranet and assumed the web master position. I developed wrote and published on line troubleshooting guides, departmental on line training program, and on line operational and maintenance procedures. I also provided primary help desk and backup on call support for company products.

Pacific Pay Video

1994 to 1995

Installation Support Manager Asia

Pacific Pay Video was headquartered in Santa Clara, CA. I relocated to Bangkok, Thailand and assumed project responsibility for installations in Thailand, Australia, Singapore, Taiwan, and Hong Kong. I was responsible for supporting company's hotel and resort pay per view video systems. My duties included evaluating and training the Thailand technical staff.

Quadrex Corp

1981 to 1994

Product Support and Customer Service Engineer

Quadrex was a nuclear power architecture and engineering systems company. I hired in as a field support engineer in the training practice. I transferred into the Quadrex Computer Systems subsidiary and became a senior product support and QA engineer for the company's nuclear reactor Safety Parameter Display Systems (SPDS). In this capacity I conducted on site visits to USA, European, and Asian customers to install new systems and perform software upgrades. I was Chairman of Configuration Control Committee, and I developed the SPDS Functional Design Specification, Software Acceptance Test Procedures, User's Reference Manual and Programmer's Reference Manual.

Commonwealth Edison

1979 to 1981

Senior Nuclear Reactor Operator

Licensed as a U.S. Nuclear Regulatory Commission Senior Reactor Operator. Worked in the training department at Dresden Nuclear Power Station.

United States Navy

1972 to 1978

SKILLS

Senior Reactor Operator

Attended Electronics Class A School, Nuclear Power School and Prototype, and proudly served on the USS South Carolina, CGN-37.

Cogswell Polytechnical College BSET

1989 to 1992

LANGUAGES

English (Native proficiency), Th (Elementary proficiency)

RECOMMENDATIONS

Ute Miller

2/27/18, 6:42 AM

Senior Vice President, Enterprise Security Solutions, North America, Mastercard

I had the pleasure to work with Monte in the security center of excellence at Oracle Consulting as well as multiple customer projects around identity and access management. Monte is a deep expert in IAM technologies from requirements analysis to architecture and deployment. He is very much focused on his customers success and the value his solutions deliver. Monte is without a doubt one of the most experienced architects I know in this field.
